BACK TO ADMIN

Once you copy the code and paste it into a text document, Word or whatever you are adding it to, you can decide whether to have anchor text or a straight link.

Let's take a look at the link...

You can see that your affiliate ID is listed in the link (underlined in blue).

This link has anchor text already added so if you were to paste it directly into your website page, it would link up and say "Click here to view more details". You can change the wording but be sure you do not remove any of the other code.

```
<a href="https://www.e-junkie.com/ecom/gb.php?ii=701369&c=ib&aff=117616&d=1144" target="ejejsingle">Click here to view more details</a>
```

If you prefer to use a direct link, for instance, if you're sending a plain text message to your mailing list or something, you can copy just the link part out of the above information and use it. Below you can see the part you need to highlight and copy.

```
<a href="https://www.e-junkie.com/ecom/gb.php?ii=701369&c=ib&aff=117616&d=1144" target="view more details">
```

That's it! Be sure to test the link before sending it to your list.
